| | |
|--|-----------|
| Algebra | 1 |
| 1.1 Special equations (part 1) | 1 |
| 1.1.1 Exponential and logarithm equations | 1 |
| 1.1.2 Other power equations | 1 |
| 1.1.3 Irrational equations | 2 |
| 1.1.4 Mixed exercises | 2 |
| 1.2 Computations with symmetric polynomials | 3 |
| 1.3 Polynomials, roots, and coefficients | 5 |
| 1.4 Special equations (part 2) | 7 |
| 1.5 More on polynomials, roots, and coefficients | 9 |
| The second prelude to mathematical proofs | 11 |
| 2.1 Mathematical arguments – Mathematical induction | 11 |
| 2.1.1 Mathematical induction | 11 |
| 2.1.2 Some variations | 12 |
| 2.2 Mathematical arguments – The well ordering principle and parity | 14 |
| 2.2.1 The well ordering principle | 14 |
| 2.2.2 Parity | 15 |
| 2.2.3 More Ramsey theory | 15 |
| 2.3 Mathematical arguments – Coloring and simple games | 17 |
| 2.3.1 Coloring | 17 |
| 2.3.2 Graphs | 17 |
| 2.3.3 Simple games | 18 |
| 2.3.4 Challenges in coloring | 18 |
| 2.4 Combinatorial geometry | 20 |
| 2.4.1 Well ordering in geometry | 20 |
| 2.4.2 Pigeonhole principle in geometry | 20 |
| 2.4.3 Mixed exercises | 20 |
| 2.5 Mathematical arguments – More on Pigeonhole principle and mathematical induction | 22 |
| 2.5.1 Pigeonhole principle | 22 |
| 2.5.2 Induction | 22 |
| 2.5.3 Ramsey theory | 23 |

| | | |
|----------|---|-----------|
| 2.6 | Mathematical arguments – Assigning weights | 24 |
| 2.7 | Proof exercises | 27 |
| 2.8 | Mathematical arguments – More on coloring, weights, and grids | 29 |
| 3 | Geometry | 31 |
| 3.1 | Law of sines, symmedian, Ceva’s theorem, and Menelaus’s theorem | 31 |
| 3.2 | Ceva’s and Menelaus’s theorems in action (part 1) | 33 |
| 3.3 | Angle chasing and cyclic quadrilaterals (part 1) | 35 |
| 3.4 | Ceva’s and Menelaus’s theorems in action (part 2) | 37 |
| 3.5 | Angle chasing and cyclic quadrilaterals (part 2) | 38 |
| 3.6 | Archimedes’ proof of the area formula of a parabolic region | 39 |
| 4 | Number Theory | 43 |
| 4.1 | Challenging computations with floor and ceiling functions | 43 |
| 4.2 | Simple proofs with floor and ceiling functions | 45 |
| 4.3 | The Fundamental theorem of arithmetic | 46 |
| 4.3.1 | Greatest common divisors (G.C.D.) | 46 |
| 4.3.2 | The Euclidean algorithm and Bézout’s identity | 46 |
| 4.4 | The Fundamental theorem of arithmetic (part 2) | 48 |
| 4.4.1 | A direct proof of the Fundamental Theorem of Arithmetic | 48 |
| 4.4.2 | Euler’s totient function | 48 |
| 4.5 | Revisiting G.C.D. and L.C.M. | 50 |
| 4.5.1 | Revisiting G.C.D. | 50 |
| 4.5.2 | Least common multiples (L.C.M.) | 51 |
| 4.6 | G.C.D., L.C.M., and prime factorization | 52 |
| 4.7 | Modular Arithmetics (part 1) | 53 |
| 4.8 | Modular Arithmetics (part 2) | 55 |
| 4.9 | Residue Classes | 57 |
| 4.10 | Inverse in modulo arithmetics and Wilson’s theorem | 59 |
| 4.11 | Modular Arithmetics (part 3) | 60 |
